Foreman - Bug #8334

searching users with "organization_id != 14" will match users that belong to org 14 _and_ another

Description

<< Accidentally deleted the original issue #7383. >>
latest cached at: http://webcache.googleusercontent.com/search?q=cache:http://projects.theforeman.org/issues/7383

If a user, or presumably other objects, belong to more than one organzation, or presumably the same for locations, then searching is not possible through neither UI nor API. Searching for "organization_id != 14" should match users that are not part of that organization.

To reproduce: Add a user to two organizations, then search by != to one of the org ids.
