| Pull request: https://github.com/foreman/foreman/pull/1936 | |
| Description | |
| Dropdown menus on the new host form when using a VMware compute resource aren't sorted alphabetically, so it is hard to find and select datastores or networks. | |

- File folders2.png added
- File folders.png added
- Status changed from Closed to Feedback

This still doesn't appear to be sorting correctly. It's only sorting on the parent name, not path.

folders.png shows what the code produces today. folder2.png shows what happens when folder.rb is changed to use ""#{path} / #{name}""

This is closer, but everything before "vm" should be truncated.

I've filed the remaining issue about truncated folder names as [#9085](#), thanks Josh.
