

Foreman - Feature #8385

Restore context to last used taxonomies at log in

11/13/2014 03:20 AM - Stephen Benjamin

Status: New	
Priority: Normal	
Assignee:	
Category: Organizations and Locations	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.7.0
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/1937	
Description Regression in 1.7 over 1.6 behavior: <ul style="list-style-type: none">- Select an organizational context different than your default (if any)- Log out or let the session expire- Log in- You'll be return to 'Any Context' (or other default) instead of the previously chosen org	
Related issues: Related to Foreman - Bug #3845: user login session ending clears chosen organ... Closed 12/10/2013	

History

#1 - 11/13/2014 03:21 AM - Stephen Benjamin

- Subject changed from *Taxonomies are no longer saved and restore at log out* to *Taxonomies are no longer saved and restored at log out*

#2 - 11/13/2014 03:26 AM - Dominic Cleal

Taxonomies have never been saved on logout, or at least, it wasn't intended. They should be saved on session expiration, which is a different case. Which are you using?

#3 - 11/13/2014 09:16 AM - Stephen Benjamin

- Tracker changed from *Bug* to *Feature*

- Subject changed from *Taxonomies are no longer saved and restored at log out* to *Restore context to last used taxonomies at log in*

- Priority changed from *High* to *Normal*

Hmm, I thought I tried both, but it is working on session expiry.. sorry.

I'll make this a feature request then!
