Target version:		
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases: 1.6.3
Bugzilla link:		Red Hat JIRA:
Pull request:		
Description		
Hi		
Foreman 1.6 from following RPM: http://yum.theforeman.org/releases/1.6/el6/x86_64/foreman-release.rpm on that Centos 6 machine, also installed foreman-vmware using RPM as well (it brings entire Ruby stack as dependencies resolve).		
steps:		
1. install puppet+puppetdb+foreman (with foreman-vmware external compute resource) in docker containers, bring them up, all works fine thus far		
2. Configure VMWare vSphere compute resource - works fine		
3. go to (in foreman GUI) "Infrastructure -> Compute Profiles"		
Boom:		
Warning!		
undefined method `stringify_keys' for #<RbVmomi::VIM:0x0000009fa2130>

#5 - 12/09/2014 04:31 AM - Tomer Paz

correction to step 3:

Create a new host profile, chose VMWare compute resource, then chose the created host profile to edit - boom...

- Status changed from New to Feedback

Followed your steps:

Tested with foreman 1.8-develop and with 1.7-stable. Can't reproduce.

Using Vsphere 5.5

This issue used to happen with RbVmomi version 1.6 + ActiveRecord, we currently use RbVmomi 1.8.2

Please let me know if it reproduces with foreman-1.7+

Thanks.
