| <b>Description</b>   |                           |
| It seems when making changes to an LDAP Auth Source that the fake masked password (which seems to be 'xxxxxxxxxx') then actually becomes the password to use for the Auth Source, thus making the password invalid and 'breaking' the Auth Source. |                           |

#### Associated revisions

Revision [dd6263aa](#) - 05/04/2011 05:42 AM - Ohad Levy

fixes #872 - LDAP Auth Source Account Password reset

#### History

#1 - 05/04/2011 05:43 AM - Ohad Levy

- Category set to Authentication
