<b>Description</b> All APIs for GET collections return in response proper json objects: <a href="http://10.35.64.2:3000/architectures?format=json">http://10.35.64.2:3000/architectures?format=json</a> {"architecture":{"name":"x86_64","id":1},"architecture":{"name":"i386","id":2}} But 'hosts' API returns only a list of host names and no hosts properties: <a href="http://10.35.64.2:3000/hosts?format=json">http://10.35.64.2:3000/hosts?format=json</a> ["itzik1.qa.lab.tlv.redhat.com","test.qa.lab.tlv.redhat.com","testLena.qa.lab.tlv.redhat.com"]
