

Foreman - Bug #8799

On host edit page, overriding inherited parameters removes override button.

Fixes #8799 - Show override button when removing overridden global param

Previously, when removing an override for an existing parameter the override button was not displayed again until the page was reloaded. Also saved call to `mark_params_override()` when overriding a single parameter since we already know which row needs to be marked as overridden, and used some css to simplify `mark_params_override()`.

Note this code will be rendered useless once global parameters are turned into lookup keys as they will use the same inline-editing available for lookup keys, however until that change is made this will improve usability of global parameter overrides.
