

## Foreman - Bug #8840

### LDAP Usergroup Refresh fails when User CN contains escaped characters

01/06/2015 05:55 AM - Frank Grötzner

<b>Pull request:</b>	
<b>Description</b>	
Hi,	
if you try to sync an Usergroup from ActiveDirectory, that has a member with an character that needs escaping (like a comma, not unusal e.g. in "surname, name" style naming), the sync will fail. I use Foreman 1.7.1 on RHEL 7.	
Please don't hesitate to ask, if you need more information.	
Best regrads, Frank
