Foreman - Refactor #8884

Drop Ruby 1.9.3 support

01/09/2015 08:52 AM - Dominic Cleal

Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/3510		

Description

Tracker for anything concerning Ruby 1.9.3 support, and being able to drop it. There are likely things in Foreman we can revert (gem pins, workarounds).

This is not likely to happen for some time as most of our supported OSes run on Ruby 1.9.3 currently.

Supported OSes currently running Foreman under Ruby 1.9.3, AFAIR:

- Debian 7 (wheezy)
- EL6
- EL7
- Ubuntu 12.04 (precise)
- Ubuntu 14.04 (trusty)

Fedora 19 and Debian 8 are the only ones using 2.x.

I'd propose that we drop support for Debian 7/Wheezy when we need to drop 1.9.3 support (which would likely be when Fog 2.0.0 is released), as I can't see any reasonable way to get a newer Ruby version.

For Precise, we could switch to newer ruby2* package from the Brightbox ruby-ng PPA.

#16 - 02/24/2016 06:05 AM - Dominic Cleal

Both Ubuntu 12.04 and Debian 7 will be deprecated in Foreman 1.11 (https://groups.google.com/d/msg/foreman-dev/j5Vvgdm-MAg/6vdOVzDKHgAJ) so they may be removed in 1.12 if needed to do this ticket.
