Foreman - Bug #8919

Allow specifying custom resource name for authorization purposes from within a plugin/model

01/13/2015 03:08 AM - Ivan Necas

Description

By default when determining the resource_type to be used for a model authorization, the name of the model class is used.
This behaviour is hard to change from within a plugin, as the logic is included in just one method
https://github.com/theforeman/foreman/blob/1.7.1/app/services/authorizer.rb#L115-L127.

My case is the foreman-tasks (http://projects.theforeman.org/issues/4450/) where there is an STI on the task model,
so the default name would be `dynflow_task`, while the desired name is just `task`.
