

Foreman - Bug #9003

Host-Audit doesn't show changes in Smart-Params done in Host-Details

Description	
When I change Paramters in Classes directly assigned to hosts, I expect to see that change in the host-Audit. (Doesn't happen right now)

This seems to work here. Can you confirm it's a smart class parameter override you're changing?

The first screenshot is my audit log, showing when I first clicked the Override on the host and saved it, then when I edited the host and changed the override. If you click the fqdn=... bit, you'll get details for the entry which are shown in the second screenshot.

Choose a host from the hosts-list, edit the host, and change a param of one of the inherited classes. This doesn't appear, when you click on audits on the host details page.

I would expect to see the changes made on the host there.

Adding two screenshots, one of the general audit page, one of the host details audit.

Searching for the host probably won't show it, as it's seen as an attribute of the Puppet class (an "override value") rather than of the host. I can't really see a search term apart from "action = update" that might bring it up - check through the unfiltered list?
