

## Foreman - Bug #9038

### IDE Devices in vSphere

01/19/2015 02:07 PM - Marco Helmerich

<b>Status:</b> New

<b>Pull request:</b>	
<b>Description</b> I converted a KVM with qemu to vmdk for importing in vSphere. Afterwards it is not possible to edit the Host in Foreman e.g. no changes in ENC are possible.  The error/stacktrace shows the failure while foreman tries to identify the scsi controller type.  Is this behavior intended e.g. IDE Devices are not supported ?.
