Description

Per group conversation:
https://groups.google.com/group/foreman-users/browse_thread/thread/6f1e1583cd392156

I would like the ability to upload a signed cert via the ldap auth page in order to use ldaps with active directory or other LDAP systems.

History

#1 - 11/18/2011 09:20 AM - Jacob McCann

- File ldap_cert.patch added

In our environment we need to use a public certificate when connecting the our AD servers. The attached is a diff of changes we made to get it to work. This is hardcoding the path to the cert in the code, so it would need to be modified to take a path from a webform instead.

#2 - 03/15/2016 03:44 AM - Ohad Levy

- Description updated

- Status changed from New to Resolved

I believe this is now fully supported - see http://theforeman.org/manuals/1.10/index.html#4.1.1LDAPAuthentication, closing - thanks!
