

Katello - Bug #9168

Offer choice for Lifecycle Environment + Puppet Environment

01/29/2015 03:18 PM - Ashton Davis

Status: Duplicate	
Priority: Normal

Description (Sorry if this is a duplicate - I searched for a while and didn't find a previous bug) Currently, when a host is given a Lifecycle Environment, "Puppet Environment" is replaced by "Content View". Not everyone is going to modify their Puppet workflow to import into Katello for release, so having the option to still select a Puppet environment would be fantastic.
