Description

I have installed Staypuft and when I click the "New Deployment" under "OpenStack Installer" tab, I am getting following error, appreciate any lead on where I am missing or anything else needs to be configured. I am bit new to foreman.

Started GET "/deployments/new" for 10.33.54.183 at 2015-02-05 20:30:06 +0000
Processing by Staypuft::DeploymentsController#new as HTML
Operation FAILED: Validation failed: Layout can't be blank
Rendered common/500.html.erb within staypuft/layouts/staypuft (3.6ms)
Rendered layouts/base.html.erb (1.0ms)
Rendered /opt/rh/ruby193/root/usr/share/gems/gems/staypuft-0.5.13/app/views/staypuft/layouts/application.html.erb (1.4ms)
Completed 500 Internal Server Error in 32ms (Views: 7.0ms | ActiveRecord: 1.8ms)

History
