**Description**

Installer for katello 2.1/foreman 1.7.2 is incorrectly configured to allow user to individually specify file names for vmlinuz0 and inird.img files, when they are released as a tarball. Either the installer options must change or the images must be made individually available on http://downloads.theforeman.org/discovery/releases/latest/

```
Index of /discovery/releases/latest
[ICO]    Name     Last modified    Size     Description
[DIR]    Parent Directory          -
[ ]     fdi-image-2.1.0.tar    14-Jan-2015 12:05      145M
[ ]     fdi-image-latest.tar    14-Jan-2015 12:05      145M
```

**History**

*- translation missing: en.field_release set to 28*

Thanks for the report. This has recently been fixed and will be in Foreman 1.8.
