Foreman - Bug #9281

Compute profile doesn't use selected security group in openstack

02/08/2015 10:40 AM - Brian Lee

Pull request:			

Description

I created some new security groups in openstack, one starts with a A so it is first in the list. All compute profiles default to that one, even after selecting the default security group. This is caused every VM that is created to have the wrong security group.
