

## Foreman - Feature #9295

### "Update Override Value" - Fields for old and new value are too small if hash (yaml) is used

<b>Pull request:</b>	
<b>Description</b> In audit log, the new/old value fields are too small to see the differences when a hash has changed.  Example: When I change firewall settings over foreman, I only see this values in audit log:  old: {"Foremanproxy Access from foreman"=>{"server... new: {"Foremanproxy Access from foreman"=>{"server...  Enhancement could be: <ul style="list-style-type: none"><li>• diff (like for templates) or</li><li>• tooltip (to show the full value)</li></ul>
