

Foreman - Bug #9359

puppet_ca parameter made available for unmanaged hosts

02/12/2015 11:51 AM - Chris Pisano

Status: Closed	
Priority: Normal	
Assignee: julien ippolito	
Category: External Nodes	
Target version: 1.10.1	
Difficulty: easy	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3039	
Description Right now in order for the puppet_ca parameter to be made available unattended needs to be set to true and a host needs to be managed. Is it possible to change the check to allow the puppet_ca parameter to be made available for unmanaged hosts as well?

After reaching out in #theforeman-dev it seems like line 357 in

<https://github.com/foreman/foreman/blob/develop/app/models/host/managed.rb#L357>

would need to be moved outside of the if block and placed where param["puppetmaster"] is. According to lines 53 - 62 in

https://github.com/foreman/foreman/blob/develop/app/helpers/hosts_and_hostgroups_helper.rb#L53-L62

puppet_ca is only enabled if there is a proxy with the CA feature enabled. It seems like we wouldn't want puppet_ca to be displayed if it wasn't enabled. I'm not sure what to do with line 357 in managed.rb since :unattended doesn't seem to have a relation to the ca proxy feature.
