<b>Description</b>	
Hi,	
It'd be nice if the length at which the hostgroup name is truncated when it's shown in the host list view could be customized via a global setting or something.	
<pre>app/views/hosts/_list.html.erb:      &lt;td class="hidden-tablet hidden-xs ellipsis"&gt;&lt;%= label_with _link host.hostgroup, 26, @hostgroup_authorizer %&gt;&lt;/td&gt;</pre>	
Our hostgroup hierarchy is quite deep and we believe that our screens are big enough to accommodate longer hostgroup names :)	
Thanks!
