

## Foreman - Bug #9437

### Improve validation message when including "invalid" characters in Role name to say why it might be invalid

02/18/2015 04:04 PM - Bryan Kearney

<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1192854">https://bugzilla.redhat.com/show_bug.cgi?id=1192854</a>	
Description of problem: I tried to create a role called "Bulkie (get it?)", and after clicking Submit, I was notified that it had failed validation and said simply "is invalid".	
Can we say what are valid (or invalid) characters? I've seen other validation strings in Satellite that say which are acceptable characters, but here I'm left to guess.	
Did that fail because of the question mark? the spaces? parentheses?	
Version-Release number of selected component (if applicable): 6.0.6	

#### History

##### #1 - 02/19/2015 07:37 AM - Dominic Cleal

- Category set to Web Interface
- Assignee deleted (Ohad Levy)
- Priority changed from Normal to Low
- Difficulty set to easy

##### #2 - 06/11/2018 01:55 PM - Aditi Puntambekar

The value "Bulkie (get it?)" is reflecting successfully on the UI after clicking Submit for role creation.

##### #3 - 07/24/2018 05:01 PM - Marek Hulán

- Status changed from New to Resolved

Hope I got the last comment right.
