Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1192131
Description of problem:
webUI console for libvirt host is not aligned correctly

Version-Release number of selected component (if applicable):
Satellite-6.1.0-RHEL-6-20150210.0-Satellite-x86_64

How reproducible:
always

Steps to Reproduce:
1. Setup Satellite in a way you can provision in libvirtd (on same system
as Satellite in my case)
2. Create new host and go to its console via:
Hosts -> All hosts -> <your_host> -> [Console]

Actual results:
VNC console/window alignment looks strange.

Expected results:
Console (VNC window) should be aligned below green bar.

History

#1 - 02/19/2015 07:47 AM - Dominic Cleal

- Status changed from New to Feedback

- Assignee deleted (Ohad Levy)

Works fine on Chrome 40.0.2214.93 on Foreman. It's possibly due to patternfly patches, please re-confirm on Foreman.

#2 - 03/16/2016 04:36 AM - Ohad Levy

- Status changed from Feedback to Resolved

I'm unable to reproduce post pattenfly migration - I assume it was closed as part of the patternfly changes.
