

Foreman - Bug #9445

Poor window formatting when adding a new Config Group

02/18/2015 04:12 PM - Bryan Kearney

Status: New	
Priority: Normal	
Assignee:	
Category: Web Interface	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1191739	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1191739	
Description of problem: Configure > Config groups > New Config Group: Layout is weird, why is Name indented? Just looks like a loose collection of stuff sitting in a window, with no real rhyme or reason as to why things are where they are.	
Version-Release number of selected component (if applicable): 6.0.7	
How reproducible: N/A	
Steps to Reproduce: 1. Navigate to Configure > Config groups 2. Click New Config Group 3. Bottom window pane organization of objects is poor	
Actual results: Objects scattered around bottom window pane.	
Expected results: Understandable and asthetically pleasing organization oof objects in window pane.	
Additional info: Screen shot attached.
