

Foreman - Bug #9446

Adding permissions for roles displays a confusing message

02/18/2015 04:14 PM - Bryan Kearney

Status: New	
Priority: Low	
Assignee:	
Category: Users, Roles and Permissions	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1191251	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1191251	
Description of problem: Administer > Roles > Add permission from the split button: Takes you to New Filter (not a title I was expecting), where you can set a permission. The string "Selected resource type does not support granular filtering, therefore you can't configure granularity" confuses me, I'm not sure what it means by granularity, or which resource types would support that.	
Version-Release number of selected component (if applicable): 6.0.7	
How reproducible: N/A	
Steps to Reproduce: 1. Navigate to Administer > Roles 2. Next to the Role, from the drop down button choose Add permission 3. Confusing message appears at bottom of screen	
Actual results: Confusing message about granular filtering is displayed.	
Expected results: No confusing message about granular filtering.	
Additional info: Screen shot attached.

- Category set to Users, Roles and Permissions

- Assignee deleted (Ohad Levy)

- Priority changed from Normal to Low

Perhaps the message could just be removed, and have the search box only appear when possible.
