Installer - Bug #9449

foreman-installer fails if lsb-release is missing on the system

02/18/2015 04:17 PM - Phillip Schichtel

Pull request:	https://github.com/theforeman/puppet-foreman/pull/296		

Description

I faced the problem on my minimal wheezy installation.
The lsb facts are missing on the system as the lsb-release package is not included in the debian base installation.

History

#1 - 02/18/2015 04:48 PM - Anonymous

- Project changed from Foreman to Installer

- Category set to Foreman modules

- Status changed from New to Assigned

- Priority changed from Normal to Low

- Assignee set to Anonymous

This is due some few usages of $::lsbdistcodename in theforeman-foreman (and theoretically $::lsbmajdistrelease in theforeman-foreman_proxy. However, at least one usage can't be deleted and it's questionable for some others, so maybe it's just better to include lsb packages in the installation docs.

#2 - 02/18/2015 10:44 PM - Phillip Schichtel

This should probably be fixes as well:

https://github.com/theforeman/puppet-foreman_proxy/issues/125

#3 - 02/19/2015 04:59 AM - Anonymous

That issue is about something else. I get that a dependency of foreman-installer on lsb-release would solve the problem from a users' point of view.

#4 - 02/20/2015 06:03 PM - Anonymous

- Status changed from Assigned to Ready For Testing

- Pull request https://github.com/theforeman/puppet-foreman/pull/296 added
