

Foreman - Bug #9559

Something went wrong when I save my new deployment in staypuft

02/26/2015 04:47 AM - Diego Michelotto

| Description | |
| I successfully installed staypuft with foreman-installer-staypuft [foreman: 1.8.0-develop, staypuft: 0.5.19]. | |
| When I save the configuration of an deployment, or if I want to see the configuration of an deployment, I obtain this error: | |
| <pre>NoMethodError undefined method `trunc' for #<#<Class:0x0000000b272490>:0x0000000a416720> app/controllers/concerns/application_shared.rb:13:in `set_timezone' app/models/concerns/foreman/thread_session.rb:32:in `clear_thread' lib/middleware/catch_json_parse_errors.rb:9:in `call'</pre> | |

History

#1 - 02/26/2015 07:44 AM - Marek Hulán

- Status changed from New to Rejected

AFAIK staypuft can't work with Foreman 1.8. Please open an issue on staypuft issue tracker, see readme on staypuft project page <https://github.com/theforeman/staypuft#contributing>

I asked staypuft devs to change readme so it does not point to Foreman nightly as it's not true anymore. I'm closing this issue as it is unrelated to Foreman.
