Foreman - Bug #961

Foreman doesn't show any error message when it doesn't reach smart-proxy

Description

Hello,

Foreman doesn't show any message when i tried to edit an host whereas smart-proxy was shut down.
When I click on Submit I stay on host's edition page without any message.
Apache's (I'm using passenger) log told me "Failed to delete the reverse DNS record: Connection refused - connect(2)"

Version trunk's debian package (commit ddee8d43580dff4b8cca9fd7375682cfe422ace4)

Thx in advance

History

#1 - 07/22/2011 10:23 AM - Paul Kelly

- Category set to Smart Proxy

- Status changed from New to Closed

This behavior has been fixed over the last month. The error messages are propagated correctly now but it is unclear which patch fixed the issue.
