- Status changed from New to Need more information

Could you provide the output from: `rpm -qa `foreman`` please?

(or run `foreman-debug` and upload it to our servers, let me know the filename)

What worries me is that this is code that's in Foreman 1.8, so it would appear you're on a newer version than 1.7.

Hello,

Yes, after verification, it was a temporary modification that I had made concerning an issue with the docker plugin. I back to the old version of this file and all is ok now.

File: `/usr/share/foreman/app/views/config_templates/_form.html.erb`

Now the docker plugin is updated and work.

Thank you for your answer.

Ah, glad you found it. Thanks for confirming!
