Description

When chaining a "params" query on the hosts list using "and" or "or", it results in an error 500.

This occurs in version 0.3rc (unconfirmed with 0.3).

In these examples I have one host with a parameter named "monitor" with value "yes".

Example queries that work fine:

- os = CentOS
- environment = production and os = CentOS
- params.monitor = yes

Example query that fails:

- params.monitor = yes and os = CentOS

Below is the error message in the logfile for this last query:

```
Processing HostsController#index (for [myip] at 2011-06-07 12:27:31) [GET]
  Parameters: {"search"=>"params.monitor = yes and os = CentOS", "action"=>"index", "controller"=>"hosts"}
