

## Foreman - Bug #9654

### If taxonomies are seeded, they should be the default orgs

03/05/2015 06:26 AM - Stephen Benjamin

| <b>Description</b>   |                                 |
| Hosts <b>must</b> have an organization/location if enabled. It makes sense to give them one.   |                                 |
| This is especially a problem in Katello, where the admin is given a Default Organization, so they don't see the Katello host itself in "All Hosts" unless they switch to "Any Context", which isn't obvious. |                                 |
