Foreman - Bug #9663

URL Encoding not working when items have "/" in their name

03/05/2015 06:56 PM - Joey D

Description

I have a partition table entry named: "CentOS PCI/GSA". The entry is created properly although after creation, the edit link is presented with the "/" inline. This causes the app to fail due to "http://...CentOS%20PCI/GSA/edit" not being encoded properly.
