

Foreman - Bug #9720

APIv1 subnets "ipam" documentation is inconsistent with v2

03/12/2015 08:09 AM - Dominic Cleal

Status:	Rejected

Pull request:	https://github.com/foreman/foreman/pull/2272	
Description		
<p>The APIv1 subnets documentation for the "ipam" attribute says it's a bool, but it's actually a string. The APIv2 docs are correct and just need copying to v1.</p> <p>https://github.com/foreman/foreman/blob/1.8.0-RC1/app/controllers/api/v1/subnets_controller.rb#L33 https://github.com/foreman/foreman/blob/1.8.0-RC1/app/controllers/api/v2/subnets_controller.rb#L36</p>		

History

- Pull request <https://github.com/foreman/foreman/pull/2272> added
- Pull request deleted ()

#2 - 03/29/2015 09:42 AM - Marek Hulán

This was changed as part of [#6444](#), as suggested in PR we should probably introduce a compatibility layer in v1 controller rather than copying the same definition. Maybe we shouldn't have changed it in v2 either.

#3 - 04/05/2016 09:57 AM - Tomer Brisker

- Status changed from Ready For Testing to New

#4 - 12/10/2017 08:53 AM - Tomer Brisker

- Status changed from New to Rejected

API v1 is deprecated. Closing.
