Foreman - Bug #9776

foreman does not show a warning if a dhcp reservation already exists and simply fails

Description

Heya,

as the subject suggests. If i try to add a new host with a hostname that was defined earlier Foreman does not show a warning.
It simply fails while adding the dhcp reservation: http://pastebin.centos.org/16936/
This also occurs while using the Discovery plugin (3.0.0).

In earlier versions, a popup was displayed with a warning which let me choose to overwrite the existing reservation with a new one.

- translation missing: en.field_release set to 28

#2 - 03/31/2015 12:29 PM - Lukas Zapletal

Please upgrade to Foreman 1.8 RC2 which contains a fix for related bug #9776. It may fix this.

Can you describe how can I reproduce this behavior?
