

## Foreman - Feature #978

### use names in hostgroups instead of ID's

06/13/2011 08:49 AM - Ohad Levy

<b>Status:</b> Rejected	
<b>Priority:</b> Normal	
<b>Assignee:</b> Ohad Levy	
<b>Category:</b> API	
<b>Target version:</b> 0.4	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b> should also allow hostgroups/hosts	

#### History

##### #1 - 06/13/2011 08:19 PM - Corey Osman

I would appreciate backward compatibility by allowing use of both.

##### #2 - 08/15/2011 06:51 AM - Ohad Levy

- Status changed from New to Rejected

Now that [#35](#) has been merged, using simple names is not good enough.

Having a complex name route - such as:  
/hostgroups/base/db/appX is imho not as useful,  
therefore, I'm rejecting the ticket.

if this bothers anyone, rails can easily make nice urls by appending the hostgroup name after the id  
e.g.

/hostgroups/1-Web-Servers/
