

Foreman - Bug #9782

Using media_path in Templates does not resolve properly

03/16/2015 09:17 AM - Mattias Giese

Status: Closed	
Priority: Normal	
Assignee:	
Category: Templates	
Target version: 1.11.1	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.8.0
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/3347 , https://github.com/foreman/community-templates/pull/256	
Description	
Using <code><%= media_path %></code> in provisioning templates always resolves to <code>!/media!</code> .	
From the IRC:	
<pre><snip> 14:08:29 Dominic lowercase: yeah, I can reproduce that, I guess something is leaking in from Rails as it has a "media_path" that would link to our installation media page - I suppose that's the result you're getting. Could you file that please? [...] 14:11:05 Dominic as a workaround you can use: <%= @host.os.medium_uri(@host) > 14:11:18 Dominic (that's what the media_path helper calls) 14:12:10 Dominic or <%= @mediapath %> actually, I think that's also the same, it's what we use in the kickstarts </snip></pre>

I tried to get @mediapath working for SUSE, but didn't succeed, maybe somebody else can spot something, I was missing here:
