

## SELinux - Bug #9804

### Initial relabeling of puppet fails on RHEL7

03/18/2015 04:52 AM - Lukas Zapletal

<b>Status:</b> Rejected

<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
On RHEL7 during installation we see those messages in the syslog:	
<pre>Mar 13 10:11:05 fseven puppet-master[20121]: /etc/selinux/targeted/contexts/files/file_contexts: invalid context system_u:obje ct_r:puppet_etc_t:s0 Mar 13 10:11:05 fseven puppet-master[20121]: /etc/selinux/targeted/contexts/files/file_contexts: invalid context system_u:obje ct_r:puppet_var_lib_t:s0 Mar 13 10:11:05 fseven puppet-master[20121]: /etc/selinux/targeted/contexts/files/file_contexts: invalid context system_u:obje ct_r:puppet_var_lib_t:s0</pre>	
I am not sure why they happen. Looks like this is harmless.	

### History

#### #1 - 12/15/2016 11:36 PM - Jason Nance

I am getting this as well on EL 7.3 in TFM 1.13.2 / Katello 3.2.1.

#### #2 - 05/27/2020 08:23 AM - Lukas Zapletal

- Status changed from New to Rejected

I am doing a cleanup of old SELinux bug reports. We are removing puppetmaster policy based on passenger\_t, most of these bugs were related to that.
