Pull request:			

Description

<amh-mw> What permissions does a role need to be able to use the 'Run Puppet' feature? I can use the feature as admin, but I'm setting up a host-restricted account for QA.
<ohadlevy> amh-mw: hmm... it seems there is no specific permission for it :(
<ohadlevy> amh-mw: which means it will require admin rights :(
<ohadlevy> amh-mw: can you open a new feature request?
<ohadlevy> amh-mw: pikelly would love to fix it for you :)
