

Foreman - Bug #9855

searching users on organization returns unexpected results

03/21/2015 08:13 AM - Thomas McKay

Status: Rejected	
Priority: Normal	
Assignee:	
Category: Search	
Target version:	
Difficulty:	Fixed in Releases:

Bugzilla link: 1204365	Red Hat JIRA:
Pull request:	
Description	
Expectation that searching "organization = ACME" would return all users that belong to this organization (ie. have ACME in their list of orgs in the UI).	
Having two users with default organization of ACME only returns one of those users too, so it's unclear what the intention of this scoped search field is intending.

- Status changed from New to Need more information

Appears to work fine here. The 'organization' field is for associations to orgs, not searching default orgs.

```
10:02 $ hammer organization info --id 9
>Id<:          9
>Name<:        Lacking foo
>Users<:
  7220test
  orgadmin
  roletest
[..]

>Created at<:   2013/05/07 17:28:54
>Updated at<:  2014/04/10 07:53:17
```

```
[] ~/code/foreman/hammer-cli-foreman [master|]
10:03 $ hammer user list --search 'organization = "Lacking foo"'
-----|-----|-----|-----|
>ID<  | >LOGIN<  | >NAME<  | >EMAIL<
-----|-----|-----|-----|
39    | 7220test | 7220 Test | a@localhost
25    | orgadmin | Org Admin | orgadmin@localhost
6     | roletest | role test | roletest@localhost
-----|-----|-----|-----|
```

#3 - 03/24/2015 12:47 PM - Mike McCune

The 'default organization' is a login preference for the UI but does not imply membership within an organization. I'd not expect this search to reflect the UI preference at all. IMO, not really a bug.
