Foreman - Refactor #9859

Add STI to environments

Description

Currently if we want to support more cfg mgmt tools we don't have a way to clearly separate puppet features from others. Therefore I think that we could add STI to environment so plugins can add more subtypes. I'm open to suggestions.

#1 - 03/22/2015 04:47 PM - The Foreman Bot

- Status changed from New to Ready For Testing

- Pull request https://github.com/theforeman/foreman/pull/2253 added

- Pull request deleted ()

#2 - 09/16/2015 10:14 AM - Dominic Cleal

- Status changed from Ready For Testing to Rejected

- Assignee deleted (Marek Hulán)

PR was rejected, as adding STI to environments didn't quite make sense. More info in the last comments there.

A better alternative would be to rename the current environment to be Puppet-specific and then add further types of environments alongside instead.
