

Foreman - Bug #990

wrong error message when looking for puppetca certificate list

06/15/2011 12:57 PM - Ohad Levy

Status: Resolved	
Priority: Normal	
Assignee: Paul Kelly	
Category: PuppetCA	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
this happens when the proxy is not reachable:	
<pre>undefined method `map' for true:TrueClass</pre>	

History

#1 - 07/22/2011 08:00 AM - Paul Kelly

- Category set to PuppetCA

When I stop the smart-proxy and then http://localhost:3000/smart_proxies/5/puppetca I get this message
Connection refused - connect(2)
Hardly elegant but certainly correct.
Could you see try this operation again?

#2 - 07/24/2011 03:11 AM - Ohad Levy

the main issue here (at least for the first error) is that the proxy library code checks the return code and the return length, if its smaller then 2 it returns a true object.

any idea why we do that?

#3 - 07/24/2011 04:16 AM - Paul Kelly

the smallest valid reply is "{}", which is two characters. JSON.parse chokes on anything less than two characters.
I guess it is trying to say:-
I got a valid rely cos the code says ok
return the value that we got or say that we succeeded in doing whatever we were asked.

A delete operation returns nothing.

yeah, but in this case, it returns simply true, which is wrong... can we look into it again?

#5 - 09/05/2011 08:50 AM - Ohad Levy

- *Description updated*

- *Status changed from New to Resolved*

This is no longer valid in 1.12-develop - the UI will correctly say that it can't contact the proxy.

Closing this, re-open if necessary :)
