## History

### #1 - 03/30/2015 08:47 AM - Dominic Cleal

- Status changed from New to Need more information

I can't reproduce this. Could you enable debug or remove the backtrace silencer (config/initializers/backtrace\_silencers.rb) and try again please? The backtrace looks filtered to me, as I don't see an issue with what's in the line it mentions.

```

```

### #2 - 03/30/2015 08:59 AM - Ohad Levy

- Status changed from *Need more information* to *Rejected*

I'm unable to reproduce, this might be a specific issue with that VM configuration, the VM actually deleted itself, and deleting other vms works just fine.. rejecting.
