

Foreman - Bug #9952

Foreman does not notify puppet run is successful when running on more that one node

03/30/2015 01:57 PM - Jeff Sparrow

Status: New	
Priority: Normal	
Assignee:	
Category: Puppet integration	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.6.1
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>If you select multiple nodes to "run puppet" and initiate the run, there is nothing that tells you if it was successful. The green notice does not appear with multiple nodes selected. In addition, the time it takes to update is extremely long. For 3-5 hosts its about 3 minutes before the page is refreshed. Once refreshed there is nothing to tell you if it was successful.</p> <p>Ideally Foreman would present the successful (or failed) pop up immediately upon execution, so that the users know it is working on the runs.</p>

Bump. Not sure if newer versions of Foreman display what host a Run Puppet failed on, but its not very helpful when selecting 20+ hosts and one single host fails. You get an error message saying Runinng Puppet failed.
